Security Awareness for IT Staff

a **Cyber-Sheriff** training course from **EDUTECH**

"Deliver secure solutions!"

Confidently delivering secure IT solutions & services is an uphill battle!

IT solutions & services face increasing cyber-security threats, ever-changing regulatory requirements. It's a challenge for IT departments to build & maintain a reputation for delivering quality IT services in today's tough business environments. Understanding the risks and incorporating the right controls to address them is an absolute necessity, if your organization's valuable info is to be protected.

We will explain the threats that could impact your IT solutions & services, and how best to combat them.

COURSE OBJECTIVES
- To provide a current overview of the threats and potential impact that could affect your organizations.
- To provide a focused look at specific attacks on your organization's IT solutions & services, and how to avoid them.
- To introduce prevalent security standards, practices, tools & techniques for designing & delivering a secure IT environment for your organizations.

WHO SHOULD ATTEND
- IT leaders
- IT project and delivery staff

COURSE BENEFITS
- Understand the cybersecurity threat landscape, and specific threats to IT solutions & services.
- Understand & appreciate the importance of information security & regulatory compliance.
- Benefit from hints, tips, templates and practical guidance on delivering secure IT solutions & services.
- **Malaysia HRDF-claimable.**
